Subject: [REDACTED] property and I-5 Corridor Reinforcement Project

Dear Ms. Teresa Kubo,

I spoke with you several months ago on the phone at the advise of Mr. Seth Oster and Mr. Richard Parkin. Thank you for your time in speaking with me about my family's property in Washington State on the East Fork of the Lewis River near Battleground Washington. The BPA I-5 Corridor Reinforcement Project Route 30 proposes to run its electrical lines right through our property on what I and my family believe is very environmentally sensitive land. We are strongly opposed to the use of Route 30 (or any other designation for the route running through our property) for the I-5 Corridor Reinforcement Project. My family has mailed you more detailed information about this area which you should receive in the next few days. I appreciate any time or effort spent by you looking into this issue. The most recent information that we have regarding the status of this project would lead us to believe that the BPA is strongly considering using other routes which would not affect our property. This is really great news if it is true but we are still concerned that the alternate proposed routes still would affect us. Thank you for your attention to this matter.

Sincerely,
[REDACTED]
